

The Green Spa

The Yu Spa at the Apex City Quay Hotel and Spa in Dundee has been classed as the first Green Spa in Scotland.

- The spa uses Elemis products that are 100% natural and not tested on animals
- The pool uses 'ozone' to keep it clean with minimal chlorine
- The pool and hot tubs are backwashed regularly to keep the filtration in good order to avoid the need for coagulant chemicals
- Hot tubs use ultraviolet light to clean themselves
- Hot tubs are covered at night, reducing heat loss and water evaporation
- Pool lights have energy efficient LED lights
- Showers have flow regulators
- The spa bulk buys eco friendly cleaning chemicals and use dosage dispensers
- Provide water bottles to all members to encourage refilling and reusing
- Treatment products are bulk bought where possible
- Gas consumption in the spa is monitored separately from the Hotel to monitor gas used per user, enabling the spa to identify potential energy savings
- The spa has been audited through environmental bodies
- Aerators are fitted to taps.
